

RODADERO SILVER / GOLD PROJECT

CENTRAL SONORA

Ongoing drilling confirms Garibaldi discovery of shallow high-grade system at Silver Eagle (see Oct. 23 & Aug. 5 news releases)

Rodadero North targets expanded from 8 to 11

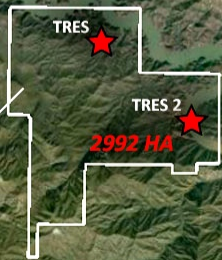

Drilling along almost 100 meters of strike length has returned significant high-grade silver intersections within 50 m of surface, more assays pending

Discovery hole SE-14-01:
65 oz/t Ag (2,010 g/t) over 23.1 feet (7 m)

Mineralization open in all directions

High-grade silver & gold sampled immediately southeast & east of Silver Eagle
