

NICKEL MOUNTAIN, ESKAY CAMP

"Metals That Will Power The New Economy"

Dr. Lightfoot

Leadership. Moving Forward. Building Value.

UNIQUE ESKAY CAMP HIGH-GRADE DISCOVERY!

- ✓ 84 drill holes completed by Garibaldi since 2017 at Nickel Mountain, 15 km southwest of the Eskay Creek mine, have outlined world class nickel grades in addition to 10 other metals in multiple massive sulphides zones
- ✓ EL-19-53 cut 18.2m @ 7.0% Ni, 3.8% Cu, 4.6% combined Pd-Pt-Au within 86.5m @ 1.9% Ni and 1.3% Cu (69.2m true width)
- ✓ Large disseminated footprint and a very clean overall metallurgical profile
- ✓ Drill hole EL-19-80, a step-out to the east, confirms the E&L Intrusion extends at least 400 meters along plunge
- ✓ Drill hole EL-19-82 (9.83m core length of massive sulphides @ 7.2% Ni, 3.6% Cu and 4.8 g/t Pd-Pt-Au) shows the eastern side of the Lower Discovery Zone is thickening to the north where two significant borehole EM conductors coverage and provide a high-priority drill target area for 2020
- ✓ GGI owns 100% of more than 200 sq. km in Eskay Camp including newly discovered high-grade gold quartz vein system at "Casper", 15 km north of Nickel Mountain

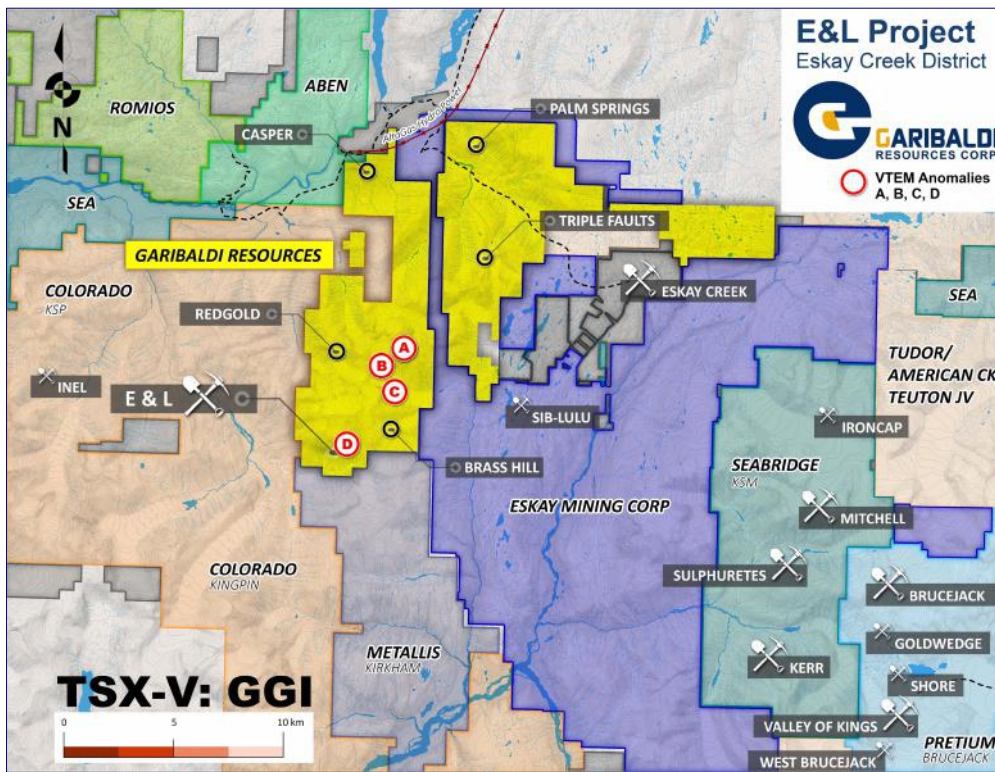

THE NICKEL MOUNTAIN "MAGMA HIGHWAY" FEATURES MORE THAN A DOZEN HIGH QUALITY VTEM CONDUCTORS UP TO 12 KM NORTHEAST OF THE 2017 MASSIVE SULPHIDE DRILLING DISCOVERY

Loop textured massive pyrrhotite-pentlandite-chalcopyrite, granular pentlandite and chalcopyrite grains forming on larger pyrrhotite grains

REGIONAL GRAVITY SIGNATURES, NORTH AND NORTHEAST TRENDING FAULTS INFLUENCING EMPLACEMENT OF NICKEL MOUNTAIN GABBROS AT MULTIPLE LOCATIONS, AND RECENT VOLCANISM ALONG NORTHEAST AND NORTH TRENDING STRUCTURES, IMPLY A LONG-LIVED DEEP SEATED STRUCTURE PERMISSIVE FOR RAPID ASCENSION OF PRIMITIVE METAL-BEARING MAGMA

GGI SHARE STRUCTURE

Outstanding	116.0 million
Options	4.4 million
Warrants	3.2 million
Fully diluted	123.6 million
Market Cap	\$94 million (Feb. 27, 2020)

- ü Garibaldi's discovery of a nickel-copper-rich massive sulphide system in the heart of a producing gold camp is a major new development in the young history of the prolific Eskay Camp
- ü Pretium's Brucejack mine, one of world's highest-grade gold mines, is now in commercial production
- ü Seabridge Gold's KSM Project represents the greatest concentration of gold and copper (in reserves) anywhere in the world
- ü The rich Eskay Creek mine produced more than 3 million ounces of gold and was the world's 5th largest silver producer
- ü \$1 billion+ in recent new infrastructure has brought in new roads and power, opening the district to increased exploration and production potential
- ü Receding glaciers have exposed widespread new mineralization, creating multiple new discovery opportunities

THE GARIBALDI APPROACH AND ADVANTAGE IN MEXICO

Through the strength of its geological team and the use of cutting-edge technology and proprietary data, Garibaldi has built a foundation for lasting success in Mexico with 4 robust projects:

- ü 11 high-grade targets in addition to Silver Eagle identified at Rodadero Ag-Au Project through hyperspectral remote sensing data and extensive surface sampling
- ü Advancing La Patilla Gold Property to extraction stage
- ü Project value is being cost-effectively unlocked

Cautionary Statement:

This document contains forward-looking information, including statements relating to "expectations", "intentions" or "plans" of Garibaldi Resources Corp. (the "Company"). Such information involves known and unknown risks, uncertainties and other factors including availability of funds, the results of financings and exploration activities, the interpretation of drilling results and other geological data, project cost overruns or unanticipated costs and expenses, and other risks identified by the Company in its public securities filings that may cause actual events to differ materially from current expectations. Readers are cautioned not to place undue reliance on these forward-looking statements, which speaks only as of the date of these documents.

This document is not and does not constitute an offering memorandum under securities laws.

Jeremy Hanson, professional geoscientist, VP Exploration-Canada for the company, and a qualified person as defined by NI 43-101, has reviewed and approved the technical disclosure in this document.
